

GraceSmart™ Columns

High Quality HPLC Phases at Exceptional Value

- High purity phases
- Efficient and reproducible separations
- General use selectivity
- Exceptional value

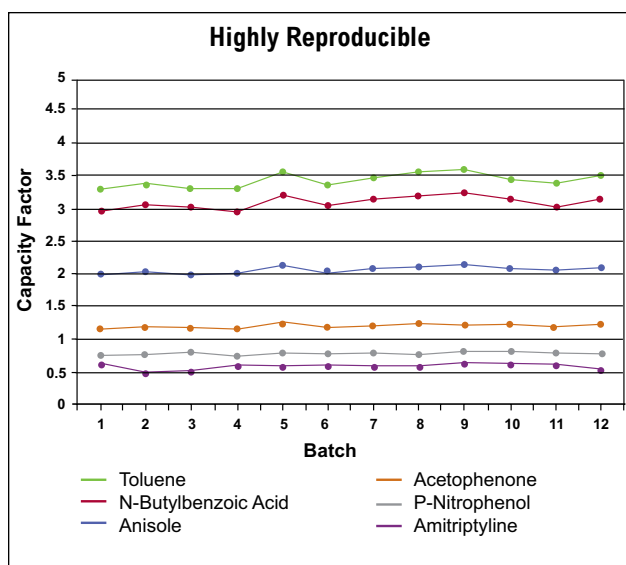

GraceSmart™ HPLC phases use high-purity silica and are monomerically bonded with uniform coverage. This translates into symmetrical peaks for acids/bases, and predictable reversed-phase selectivity. Whether routine analysis or new method development, use GraceSmart™ columns to get premium performance at exceptional value.

Reproducible Methods Start with Reproducible Columns

Our tightly controlled silica synthesis and bonding keep capacity factor and selectivity variations to a minimum. The advanced packing methods deliver consistently high column-to-column efficiency. Every column is individually tested and shipped with a quality assurance chromatogram.

Consistent batch-to-batch capacity for acidic, basic, and neutral compounds.

Expect Competitive Performance

Six sigma techniques and lean manufacturing are key to our cost competitive position, without compromising quality or performance. GraceSmart™ columns show similar or better efficiency and asymmetries for challenging base and acid components in comparison to industry leading columns.

GraceSmart™ columns compare favorably to leading competitor columns.
